

Dolphin

Contract Manager v4.0
Technical Requirements
(SharePoint 2013)

This document details the technical requirements for Dolphin Contract Manager v4.0 with regard to SharePoint, SQL Server and Office dependencies, and is provided primarily for technical resources at clients implementing Dolphin for contract management.

Server Pre-requisites

- SharePoint 2013 Standard or Enterprise, with Service Pack 1 minimum (slipstream/integrated version)
- Minimum 4 CPU cores or vCPUs
- 16GB RAM (minimum) 24 GB RAM (recommended)
- 160 GB system disk for base installation, 120 GB secondary disk (search index data, logs)
- Windows Server 2012 R2 highly recommended otherwise Windows Server 2008 R2
- SQL Server 2012 with Service Pack 1 highly recommended
- SQL Server 2008 R2 minimum (no integrated reporting supported with this configuration)

Dolphin Reports

- SQL Server Reporting Services 2012 with Service Pack 1 is the minimum requirement - configured in SharePoint Integrated Mode
- Dolphin Reports will require a dedicated user account in Active Directory to be used as the Unattended Execution Account in the SSRS Service Application

SharePoint 2013 Service Applications

- Managed Metadata Service
- Search Service Application (configured and operational)
- Secure Store Service
- State Service
- Usage and Health data collection
- User Profile Service Application (configure to sync with Active Directory)

End-User PC Dependencies

- Internet Explorer version 8.x or greater
- The Dolphin site's Alternate Access Mapping URL must be added as a Trusted Site for all browsers or in Intranet Zone

- MSWord save options must be set to "The Office Document Cache"
- The Clause Picker requires Windows XP/Vista/7/Windows 8.1.
- SQL Server 2012 with Service Pack 1 highly recommended
- MS Office Professional Plus 2010 (32 bit / 64 bit) or Office Professional Plus 2013 (32 bit / 64 bit), locally installed
- MSWord save options must be set to "The Office Document Cache"
